Hyperloop Concept

The Hyperloop concept was proposed by Elon Musk in 2013 as a high-speed transportation system. Traveling directly between major cities at speeds above 700 mph, the Hyperloop system seeks to revolutionize the model of long-distance transportation. To accelerate research behind the pod concept, SpaceX hosts an annual pod competition that challenges universities from around the globe to design and build a functioning pod prototype. This annual competition has sparked new research into the sciences of magnetic levitation and vacuum transport. The full Hyperloop concept is available [here](#).

Sponsorship Tiers

Benefits	\$1,000	\$2,000	\$5,000	\$10,000
